BREVITIES OF FUN.

"What do you think of destroying the mosquito with oil?" "Crude, isn't it?"—Cleveland Plain Dealer.

The Man-"Can't I get a short cut through this field?" The Boy-"Yes, if you don't get a long toss from the oull."-Indianapolis News.

Borroughs-"Hello, old man! I'm just back from my vacation-" Phoxy -"Awfully sorry, but I can't do it. I'm borrowing money myself these days."-Philadelphia Record.

'Which is?" "Love yer neighbor while he sleeps, but watch him while he wakes."-Atlanta Constitution.

May-"Mr. Huggard called on you last evening, didn't he?" Fay-"Yes, and he made me very tired." May-"I suppose he tried to kiss you?" Fay -"Yes, and every time he kissed me I had to slap him."-Philadelphia

Mrs. Housekeep-"Do you really mean to say you are looking for work?" Harvard Hasben-"No, what I meant to say. I said I was looking for employment."---Philadelphia Press.

"Well, this is pretty rough," lamented Mr. Laertes O'Hamme, the eminent actor. "Just as I have succeeded in curing myself of the cigarette habit I am cast in the role of the heavy villain for the whole season."-Baltimore American.

ABSENT-MINDED PROPERCE

Carried Off His Brother's Apparel Instead of His Own.

The absent-mindedness of Dr. Al fred Emerson, the archaeologist, formerly of the Johns Hopkins univensity, and who is now abroad making a collection of antiques for the museum of the University of California, is well known among his Baltimore friends, says the Sun.

The memorable occasion when booked for a public lecture at the Hopkins he let his audience wait in ghastly suspense while he, all unconscious of the engagement, was found busily employed unpacking a box of of the British museum, to tell the folowing story:

The pair were en route to make some important excavations, and had enough crazy. That our animals representative in congress of the reached southern Europe when Dr. cannot say we need lime and Fifth congressional district of the Emerson appeared with an indignant phosphorus and sulphur and state, was one of the victims of the face and a letter from America in his protein to make your milk and hand. He explained that the letter eggs and wool, does not make the was from one of his several brothers, accusing him of having absent-mind- the less real. edly carried off several shirts belonging to the brother when starting abroad.

"To prove how basely false and un- capacity can often be maintained just his suspicions are," said the much cheaper by the use of, at troubled doctor, "I will get all my any rate, a generous admixture shirts and spread them out before of these concentrates than with you, and see if you can find a single farm products exclusively. We one bearing any initial other than must not forget that their actual my own."

The shirts, 11 in number, were produced, and consternation followed when they were found to be variously labeled Arthur Hale, G. Emerson, H. Emerson, I. Z., N. F. K. In fact, all wide apart as the poles. For inexcept two, these bearing no label at stance, corn has ceen selling

Hydrography in Japan.

Japan has now, next to the United States, the most completely organ- question, said that when bran ized hydrographic office in the world. The government has just received a full set of chart engraving machines similar to these used by the United States coast survey. These instruadelphia and New York, as were also had at \$14 to \$16. So here is the 461-inch spark induction coils for another, possibly still better subuse in wireless telegraphy, made for the stitute for corn at a wonderful Japanese navy. The latter are now in | saving. use, and Baron Nishi, naval attache of the Japanese legation, Washington, has said that they are working satisfactorily. They are the most powerful induction coils of the kind ever made.—Japan and America.

Dynamite Guns Obsolete.

The board of ordnance and fortifications has unanimously decided that dynamite gun batteries are obsolete in view of the recent developments in means of defense. This means that we are to have no more of these batteries beyond those now in the service. As a matter of fact, the dynamite gun did not use dynamite for firing high explosives, but wet gun cotton. The experience of past years has distinctly shown that batteries of this kind do not meet the requirements of

"Feed Stuffs."

This is a matter worthy the breeder and general farmers' most careful consideration any year but more especially a season like this, when all sorts of it, of an invention by Mr. Herbert Rose, both fodders and concentrates, of Australia, which has recently been will not only be high but hard to if the claims of its inventor are realget at any price.

I have very much fault to find motive power. with the common idea of feeding struction of a gravity wheel, with cononly what grows on the farm. > Alleged Sorcerers Burned. Hanan, a village on the borders o Anatolia, was the scene of a horrible World's Dispensary Medical As tragedy recently. There had been sociation, Buffalo, N. Y. an epidemic in the district, and as its ravages ever became greater the villagers finally felt satisfied that it was the work of sorcerers. After a thorough investigation they arrested a man named Aslan and his sister, and openly charged them with being friend. the direct cause of the disease. The two prisoners avowed their innocence, but the mob insisted that they had been heard using incantations and other evil spells, and that their sole object in doing so was to invoke an epidemic. Without delay sentence was pronounced. Aslan was burned alive on an improvised scaffold and his sister was mercilessly. tortured with red-hot irons.

Brahmas.

These popular birds are wel worthy of study as they are very pleasing and beautiful to the eye. Its general characteristics we will now describe. The size of the bird is very large, with a remarkably small head in proportion. The comb is small in size and is what is called a "pea comb," that is to say there are three ridges, the centre one of which is higher than the two crown of the head, and does not move when the bird walks. There are two quite distinct varieties of colors, the light and the dark, both of which have probably come from common origins. From what we have seen of the Buff Brahmas we will leave them out of the matter altogether. The Light Brahma must be white in color, with a white-edged neck hackle but heavily striped with deep black, which runs in as far towards the neck as possible. The wings, saddles and bodies must have a quantity of white feathering which is hard and close fitting. The foot of the Brahma stands well out and is well covered with feathers, as well as the entire leg. The tail of the fowl stands upright and in both colors the tail is black, a white bordering however making it look extremely smart. The dark variety are black breasted and slightly laced. The neck hackle is similar as in the light, the saddle hackle being heavily striped. In the Brahma "the black cock tail" is highly prized This is one in which the two or four upper sickle feathers turn grains exclusively, even oats, if York Herald, has been subjected to away from each other, the result being very beautiful. This variety is a pleasing one and can easily be kept by the amateur who has a good space at command. The standard weights for Light Brahmas are Cock, 12 lbs, cockerel 10-lbs, hen, 91/2-lbs, and pullet 8-lbs. The darks are just one pound lighter in weight. Another variety is the Barefoot Brahma not yet recognized by the Standard. They are completely devoid of feathers or feathering on legs or toes and are said to be very desirable. The originators claim them to be pure Light Brahmas, claiming to have bred them by selecting specimens light feathered and by inbreeding and careful selections have bred them so as they reproduce themselves as Light Brahmas with no feathers on legs or feet They should no no doubt become quite popular. W. R. BROWN,

Kleinburg, Ont.

Free medical advice. Men and women suffering from chronic diseases are invited to consult Dr. Pierce, Buffalo. N. Y., by letter, absolute without fee or charge. For more than thirty years as chief consulting physician to the Inva-lids' Hotel and Surgical Institute of Buffalo, N. Y., Doctor Pierce has devoted himself to the treatment and cure of chronic forms of disease. Assisted by his staff of nearly a score of Physicians, each mar a specialist, his success has beer phenomenal, ninety-eight persons n every hundred treated being ab solutely and altogether cured Women have especially availed themselves of Dr. Pierce's offer of present worth of corn it would tative of radical Bryanism in politics, free consultation by letter, thereby justify on outlay of \$40 per ton, Mr. Hemphill would have more than avoiding the unpleasant question ings, the obnoxious examinations and odious local treatments consid element in the party. He has taken ered necessary by some practition ers. Over half a million women have been treated by Dr. Pierce and his staff for diseases peculia to women, with unvaring success Write without fear as without fee will be one of the chief features in the Every letter is treated as strictly private and sacredly confidential and all answers are sent in plain envelopes; bearing no printing up on them.
